

Register now to see our Mobility Hub Network in Action

Wednesday 1st October 2025 in Bristol

We are excited to be leading on a tour of the **largest and most innovative Mobility Hub Network** that we designed, built and installed in Bristol and South Gloucestershire. **Only a few spots remaining!**

This tour will provide an exclusive opportunity to view the Gold Accredited [Mobility Hubs](#) including our flagship hub at UWE, Bristol.

You're invited to come along, ask any questions you may have and receive in-depth explanations on the design choices, implementation processes and the real-world impact of these innovative transport solutions.

How are Mobility Hubs shaping the future of sustainable travel?

Our co-founder, Habib, will be leading a talk at the conference on 2nd October, presenting the facilities of each hub, highlighting their role in supporting **sustainable, accessible, and connected travel**.

What makes our Mobility Hubs stand out?

Our Mobility Hubs are designed to meet the evolving needs of the city, **reducing car dependency** while promoting green and shared modes of transport. By combining transport infrastructure with environmentally conscious and socially inclusive design, they deliver lasting benefits for both people and the planet.

Each hub includes **features such as parklets, green roofs, solar power and secure bike storage**, creating spaces that are functional, accessible and built for the future. Our approach emphasises **increasing biodiversity, improving accessibility and supporting low-carbon travel**. These elements are helping to reshape how Bristol and South Gloucestershire moves and setting a model for sustainable transport in the future.
