

Congratulations if you were successful in the latest round of DfE's SuDS in Schools funding!

We'd be delighted to support your school project with free data modelling, desktop and site surveys, design, installation and maintenance.

With over 5 years of **DfE funding**, we've successfully delivered functional and interactive SuDS features for hundreds of schools including:

Educational nature workshops, sensory rain gardens and custom-made SuDS planters

We're excited to announce phase 3 of the East Sussex Blue Heart SuDS project

In phase 1 and 2, we worked alongside East Sussex County Council to install a range of SuDS planters in 32 schools across the county to make flood resilience fun and engaging for pupils. The project was funded by Southern

Water and focused on combining practical flood mitigation with hands-on learning.
